EXPERIENCE

User Experience Designer (September 2012–November 2014)
Warner Bros. Games / Turbine Inc., Needham, Massachusetts

Turbine, a subsidiary of WB Games, is the creator of several multiplayer PC games, including: The Lord of the Rings Online, DC Comic's Infinite Crisis, and Dungeon's & Dragons Online. As a UX Designer my duties included creation of user interfaces for web, mobile, and in-game. This involved gathering requirements from the stakeholders then creating sitemaps, user flows, wireframes, and click-through demos. I would then work with stakeholders, designers, and developers throughout the project. Additionally, I provided front-end development and design support to the Web team.

Front-end Web Developer (September 2011–August 2012)
Warner Bros. Games / Turbine Inc., Needham, Massachusetts

My responsibilities on the Web team included the being the primary front-end developer of several web projects, and also providing design support to the team.

Web Designer (April 2009–August 2011)
Warner Bros. Games / Turbine Inc., Needham, Massachusetts

As a Web Designer on the Marketing team, my role was to design web pages, banner ads, and flash animation, as well as develop email templates and web pages.

Lead Web Developer & Designer (July 2008–January 2009)
NeighborhoodScout, Woonsocket, Rhode Island

At NeighborhoodScout I was solely responsible for all front-end web development of the site, utilizing XHTML, CSS, Javascript, AJAX, XSL, and XML. My other responsibilities included creating a new Flash-based map interface using the Google Maps API, and designing new page layouts and graphical assets for the site.

Lead Web Developer (August 2003–July 2008)
Staples, Inc, Framingham, Massachusetts

As a Lead Web Developer in the Marketing department at Staples, I had a wide variety of development responsibilities. Primarily, I worked on Flash-based rich media, developing web sites, emails, and managing project assignments for the group. Highlights include:

- » Developed Flash games, banner ads, and applications
- » Implemented template driven email program that cut email creation time significantly
- » Supervised, trained, and assigned projects to Junior Developers
- » Built several internal applications, including a PHP/MySQL application to track of project and team status.
- » Awards: MITX award for the Staples Employment Brand site and the 2007 American In House Design Award for Staples "Copy Cat" site, and nominated for a MITX for the 2006 holiday site: "Department of Unexpected Gifts"

Web Developer (August 2000–April 2003)
Blue Dolphin Group, Wayland, Massachusetts

Blue Dolphin is a re-seller of magazines via their web site and via email. My primary role was web design and maintaining the front-end of the company's site, as well as prototyping and wireframing additions to the site.

Web Developer (June 1999–July 2000)
The Sunbury Group, Bangor, Maine

I was the lead designer and developer on over a dozen web sites for various clients. My functions included graphic design, front-end development, back-end development, and setting up web servers. Additionally, during my time here I built a site administration application that would allow clients to update the content of their sites using a template driven site creation tool.
